PLATFORM 1

## SAN FRANCISCO BART

New "C" car leads a train at the Daly City, Calif. station, November 15, 1991. The "C" car, 410 here, with a flat end can be used anywhere in the train providing increased flexibility. These GEC/Alsthom built cars, 1988-90, are the first new cars purchased since the 1970-72 Rohr built "A" and "B" cars.
